INTERNATIONAL FACTS & FIGURES

REVIEW 2020
UNIVERSITÉ DE RENNES 1 is located in the capital city of western France 5th largest French region in terms of research and development staff

Rennes is the 8th largest French student city, with 67,000 students, 8,000 international)
Welcome to Université de Rennes 1  
Université de Rennes 1 member of EDUC, the European DigitalUniverCity

International key partners (Training & Research)

International training offer

- Double-degrees in Europe
- Double-degrees and delocalized training in the rest of the world
- Programmes taught in English at Université de Rennes 1

Mobilities (students and staff)

- International students key figures
- Outgoing student mobility
- Outgoing staff mobility
Université de Rennes 1, which finds its roots in the XVth century, is among the 12 main universities in France. It is a multidisciplinary university with a reputation for excellence and dynamic research. Located in the centre of a human-scale city, it is just 1.5 hours away from Paris.

Université de Rennes 1 is a research-intensive university, willing to fully take part in the major challenges of innovation and knowledge of our century. Its expertise in research and its links with the economic sector have made Université de Rennes 1 renowned on an international scale.

Université de Rennes 1 has got 17 IRP (International Research Project, former LIAs), 4 IRN (International Research Networks), and offers degrees taught entirely in English in the fields of Chemistry, Environmental science, Mathematics, Computer Sciences, Business and management, Economics.
30,000 STUDENTS
130 NATIONALITIES
450 Students on delocalized campuses

17 INTERNATIONAL RESEARCH PROJECTS (IRP, former LIAs) in association with CNRS or Inserm

OUR AREAS OF EXPERTISE:

VILLEJEAN
Health sciences
Faculty of Medicine, Faculty of Pharmacy, Faculty of Dentistry

CENTRE
Humanities
Faculty of Law & Political Science, faculty of Economics
IPAG (Public Administration School), IGR-IAE Rennes (Graduate School of Management)

BEAULIEU
Faculty of sciences
Mathematics, Philosophy
Computer Sciences & Electronics, Life Sciences & Environment, Sciences & Properties of Matter,
Scientific Observatory (OSUR)
- University Institute of Technology
- Rennes School of Engineering (ESIR)

Lannion
University Institute of Technology + ENSSAT Engineering school

Saint-Brieuc
University Institute of Technology

Saint-Malo
University Institute of Technology

RENNES

30 LABORATORIES
Université de Rennes is a member of EDUC Alliance, one of the 17 first European Universities selected by the European Commission in 2019.

EDUC aims to strengthen the European identification process by enhancing knowledge creation and by putting forward European skills acquisition through digitally supported cross-campus and cross-disciplinary teaching activities as well as various learning opportunities.

The graduates will acquire competencies not only to create their individual journey through higher education systems but also to empower them to act as self-conscious European citizens. The students will receive a high-level, profoundly European education on the path to an EDUC degree system in 2025.

EDUC will create a community of practice to experience and enact the common values and cultural diversity.
International

KEY PARTNERS

Research & training
3,200 international students
17 International Research Networks with CNRS or Inserm
1 International research Lab
33 Double-degrees
Southeast University and Université de Rennes 1 started their cooperation as early as in 1989.

In 2006, both parties jointly established Sino-French Biomedical Information Research Centre. Thanks to the exchanges and cooperation for almost 30 years, both parties have formed sound cooperative relationship of supplementation in respect of scientific research and teaching. Moreover, fruitful cooperation results have been obtained. At the same time, the cooperation between the two universities has been highly recognized by the governments of both countries.

Rennes Graduate School of Southeast University was officially inaugurated in May 2017, on the scientific Campus of Université de Rennes 1.

Rennes Graduate school of SEU offers Master’s degree and Doctorates in the fields of Signal and image processing, Electronics, Chemistry, Economy and management, Biology and Health.
French-Azerbaidjani University (UFAZ)
Baku, Azerbaijan

It is administered by the historic university of Azerbaijan - the Azerbaijan State Oil and Industry University (ASOIU-), and University of Strasbourg (Unistra).

UFAZ students will receive two national diplomas (French and Azerbaijani) upon graduation – one by the Azerbaijan State Oil and Industry University and another by University of Strasbourg or University of Rennes 1 (depending on their specialty).

Université de Rennes 1 provides a professionnal Bachelor degree in the fields of Oil exploration and exploitation, with courses given by specialist teachers of our Universitary Institute of Technology of Lannion.
The FGU emerged on 26 May 2018, when was signed in Tbilisi an intergovernmental agreement between the French ministry of Europe and Foreign Affairs, Jean-Yves Le Drian, and Mikheil Chkhenkeli, the Deputy Minister of Education of Georgia.

FGU completes the French training offered by Université de Rennes 1 in the Caucasus area, and also constitute an opportunity for students of surrounding regions such as Iran, to be able to get a French degree locally.

Université de Rennes 1 provides a professional Bachelor’s degree « Food Technology, production management in Milk Industry » taught by professors of the University Technology Institute of Saint-Brieuc. At the end of their training, students will be awarded a double-degree, by Université de Rennes 1 and by Georgian Technical University (GTU).
Long-lasting collaboration between INRS and Université de Rennes 1 has led to several strong parternships, among which:

• Master’s degree in Molecular and Cellular Biology (department of Life Sciences), INRS-IRSET

• Master’s degree in geoengineering
  Water sciences and Earth Sciences, INRS-OSUR

• International Research Project RE-SO
  (Exploitation of deep sea resources and protection of surface water resources: relations between science and decision-making, in association with the CNRS)
Laboratory for Innovative Key materials and Structures
Tsukuba, Japan

The international Research laboratory CNRS-St-Gobain – Laboratory for Innovative Key materials and Structures (LINK), is hosted by the National Institute for Materials Science (NIMS) in Tsukuba, Japan. It was launched in 2014.

Université de Rennes 1 is one of the partners through the “mirror laboratory” based at the Chemical Sciences Institute (UMR CNRS 6226). This common laboratory is the result of a long and fruitful partnership, that started in 2010.

Every year, common workshops take place alternatively in Japan or in France, enabling to exchange around results of cooperations.
Long-lasting cooperation between Université de Rennes 1 and Univeridade Federal do Rio Grande do Sul was formalised by a general agreement in 2013,

A Chemical Engineering Centre (PICS)

- An IRN (International Research Network) in law, economics, geography and history “World regional integration” including a UNESCO Chair

- CAPES-COFECUBs in chemistry and pharmacy
  [CAPES: Coordination for the Improvement of Higher Education, COFECUB: French Committee for the Evaluation of Academic and Scientific Cooperation with Brazil]
INTERNATIONAL TRAINING OFFER & double-degrees

Master Economy and public management
University of Science (Ho Chi Minh)
Master Applied Mathematics

BURUNDI

University of Bujumbara
Bachelor Computer sciences
Programmes taught in english

• **Summer schools**

ENSSAT Engineering school (Lannion campus)
EIT Digital summer school (Rennes campus)

• **Bachelor programmes**

Bachelor’s degree in Life science (international track)
Bachelor’s degree in Business and Applied economics

• **Master programmes**

**Chemistry:** Master CatgreenChem

**Environmental science:**
International MSc Biodiversity Ecology and Evolution
‘IMABEE’ Master Functional Behavioural and Evolutionary Ecology
Master Ecology of Global changes

**Physics and properties of the matter:**
Master Nanosciences, Nanomaterials & Nanotechnologies

**Computer Sciences:**
Master Cloud and Network infrastructures
Master Cybersecurity
Master Computer Sciences (Research-oriented)
Master in Data Science
Master in Fintech (Finance Technology)- economy + computer sciences

**Mathematics:** Master programme in Fundamental Mathematics

**Management:**
Master Marketing, Franchising, Retail
Master in International Human Resources project management
MBA in International Management

**Economics:**
Master of Finance, (research-oriented)
International Master in Public Finance

---

**ERASMUS MUNDUS MaMaSELF+** is a 2-year international Master course delivering multiple Master degree, and recognized as a European high-level training in this field since 2007. It covers fundamentals of Materials and also proposes focus on energy related applications. The Master course’s structure consists in 3 semesters of classes plus a 4th semester dedicated to a Master-thesis/internship in highly recognized European universities in France, Germany, Italy and Poland.
