The department of life sciences belongs to the faculty of Sciences of Rennes Beaulieu, close to Mathematics, Computer sciences, Chemistry and Physics departments... All of them working closely with our laboratories and research teams. As a result, the Undergraduate Biology programme team provides high-quality specialized courses.

The faculty of Sciences was founded in 1840, whereas the Université de Rennes comes from the Université de Bretagne which was originally founded in 1461.

The department of life sciences has 3 main areas of study:
- Biology
- Agronomy
- Health sciences

UNIVERSITY KEY FIGURES

30 000 students
13% internationals
30 research labs

more than 150 partner universities
RENNES is a lively, attractive, affordable and safe city, located only 1.5 hour away from PARIS.

PRESENTATION

Track : Cell Biology, Genetics, Microbiology and Physiology
This course is designed to give students:

- Solid knowledge, practical and analytical skills, and allows them to understand the livings at molecular, cellular, organ and organism levels.
- Solid skills to gain theoretical and technical knowledge in various fields like cellular and molecular biology, genetics, microbiology and animal physiology throughout a progressive specialisation.

COURSE LIST

Student facilities

As an exchange student, you can have a room booked by the International office of the department of Life sciences in one of Rennes’s public students residencies. The rent of the student rooms is quite cheap, between 165 € and 244 € depending on options (renovated or standard room).

Furthermore, living on the campus allows you to access easily to the university’s services, such as: theatre, sport activities, cafeterias, while being located about 10 minutes away by bus from the city center.
